GALVESTON, TEXAS 77550

CESWG - RDN

12 March 2026

MEMORANDUM FOR RECORD

SUBJECT: US Army Corps of Engineers (Corps) Pre-2015 Regulatory Regime
Approved Jurisdictional Determination in Light of *Sackett v. EPA*, 143 S. Ct. 1322
(2023),¹ SWG-2019-00491²

BACKGROUND. An Approved Jurisdictional Determination (AJD) is a Corps document stating the presence or absence of waters of the United States on a parcel or a written statement and map identifying the limits of waters of the United States on a parcel. AJDs are clearly designated appealable actions and will include a basis of JD with the document.³ AJDs are case-specific and are typically made in response to a request. AJDs are valid for a period of five years unless new information warrants revision of the determination before the expiration date or a District Engineer has identified, after public notice and comment, that specific geographic areas with rapidly changing environmental conditions merit re-verification on a more frequent basis.⁴ For the purposes of this AJD, we have relied on section 10 of the Rivers and Harbors Act of 1899 (RHA),⁵ the Clean Water Act (CWA) implementing regulations published by the Department of the Army in 1986 and amended in 1993 (references 2.a. and 2.b. respectively), the 2008 *Rapanos-Carabell* guidance (reference 2.c.), and other applicable guidance, relevant case law and longstanding practice, (collectively the pre-2015 regulatory regime), and the *Sackett* decision (reference 2.d.) in evaluating jurisdiction.

This Memorandum for Record (MFR) constitutes the basis of jurisdiction for a Corps AJD as defined in 33 CFR §331.2. The features addressed in this AJD were evaluated consistent with the definition of "waters of the United States" found in the pre-2015 regulatory regime and consistent with the Supreme Court's decision in *Sackett*. This AJD did not rely on the 2023 "Revised Definition of 'Waters of the United States,'" as

¹ While the Supreme Court's decision in *Sackett* had no effect on some categories of waters covered under the CWA, and no effect on any waters covered under RHA, all categories are included in this Memorandum for Record for efficiency.

² When documenting aquatic resources within the review area that are jurisdictional under the Clean Water Act (CWA), use an additional MFR and group the aquatic resources on each MFR based on the TNW, interstate water, or territorial seas that they are connected to. Be sure to provide an identifier to indicate when there are multiple MFRs associated with a single AJD request (i.e., number them 1, 2, 3, etc.).

³ 33 CFR 331.2.

⁴ Regulatory Guidance Letter 05-02.

⁵ USACE has authority under both Section 9 and Section 10 of the Rivers and Harbors Act of 1899 but for convenience, in this MFR, jurisdiction under RHA will be referred to as Section 10.

CESWG-RDN

SUBJECT: Pre-2015 Regulatory Regime Approved Jurisdictional Determination in Light of *Sackett v. EPA*, 143 S. Ct. 1322 (2023), SWG-2019-00491

amended on 8 September 2023 (Amended 2023 Rule) because, as of the date of this decision, the Amended 2023 Rule is not applicable in this state due to litigation.

1. SUMMARY OF CONCLUSIONS.

Provide a list of each individual feature within the review area and the jurisdictional status of each one (i.e., identify whether each feature is/is not a water of the United States and/or a navigable water of the United States).

Name	Feature Type	Size (acres)	Location (latitude) (longitude)		Jurisdictional Status
SA015	pond	0.26	30.079186	-95.651588	non-adjacent, non-jurisdictional
WA006	wetland	6.65	30.086311	-95.646742	non-adjacent, non-jurisdictional
WA006a	wetland	0.08	30.087399	-95.646496	non-adjacent, non-jurisdictional
WA006b	wetland	0.17	30.085327	-95.647788	non-adjacent, non-jurisdictional
WA006c	wetland	0.21	30.085010	-95.649819	non-adjacent, non-jurisdictional
WA006d	wetland	0.05	30.087937	-95.646320	non-adjacent, non-jurisdictional
WA008	wetland	0.07	30.088179	-95.645375	non-adjacent, non-jurisdictional
WA009	wetland	0.31	30.088206	-95.646014	non-adjacent, non-jurisdictional
WA010	wetland	0.90	30.084263	-95.650134	non-adjacent, non-jurisdictional
WA011	wetland	0.37	30.083318	-95.650728	non-adjacent, non-jurisdictional
WA013	wetland	1.28	30.080659	-95.651381	non-adjacent, non-jurisdictional
SX002	wetland	0.24	30.079744	-95.651432	non-adjacent, non-jurisdictional
WX001	wetland	0.05	30.079354	-95.651381	non-adjacent, non-jurisdictional

Name	Feature Type	Size (Linear feet)	Location (latitude) (longitude)		Jurisdictional Status
SA010	Ditch	86	30.081568	-95.651649	non-RPW, non-jurisdictional
SX001	Ditch	467	30.081425	- 95.651497	non-RPW, non-jurisdictional
SA016	RPW Stream	3,120	30.078184	-95.651915	RPW, jurisdictional

RPW= Relatively Permanent Water

3. REVIEW AREA. Approximate 76-acre property located at the intersection at Waller-Tomball Road and Calvert Road; located at Latitude 30.084671°, Longitude -95.648877°, Tomball, Harris County, Texas.
4. NEAREST TRADITIONAL NAVIGABLE WATER (TNW), INTERSTATE WATER, OR THE TERRITORIAL SEAS TO WHICH THE AQUATIC RESOURCE IS CONNECTED. Spring Creek
5. FLOWPATH FROM THE SUBJECT AQUATIC RESOURCES TO A TNW, INTERSTATE WATER, OR THE TERRITORIAL SEAS. SA016, an unnamed tributary, flows south connecting to Willow Creek, which then flows east approximately 13.4 river miles into Spring Creek, a TNW.
6. SECTION 10 JURISDICTIONAL WATERS⁶: Describe aquatic resources or other features within the review area determined to be jurisdictional in accordance with Section 10 of the Rivers and Harbors Act of 1899. Include the size of each aquatic resource or other feature within the review area and how it was determined to be jurisdictional in accordance with Section 10.⁷ N/A
7. SECTION 404 JURISDICTIONAL WATERS: Describe the aquatic resources within the review area that were found to meet the definition of waters of the United States

⁶ 33 CFR 329.9(a) A waterbody which was navigable in its natural or improved state, or which was susceptible of reasonable improvement (as discussed in § 329.8(b) of this part) retains its character as "navigable in law" even though it is not presently used for commerce, or is presently incapable of such use because of changed conditions or the presence of obstructions.

⁷ This MFR is not to be used to make a report of findings to support a determination that the water is a navigable water of the United States. The district must follow the procedures outlined in 33 CFR part 329.14 to make a determination that water is a navigable water of the United States subject to Section 10 of the RHA.

in accordance with the pre-2015 regulatory regime and consistent with the Supreme Court's decision in *Sackett*. List each aquatic resource separately, by name, consistent with the naming convention used in section 1, above. Include a rationale for each aquatic resource, supporting that the aquatic resource meets the relevant category of "waters of the United States" in the pre-2015 regulatory regime. The rationale should also include a written description of, or reference to a map in the administrative record that shows, the lateral limits of jurisdiction for each aquatic resource, including how that limit was determined, and incorporate relevant references used. Include the size of each aquatic resource in acres or linear feet and attach and reference related figures as needed.

- a. TNWs (a)(1): N/A
- b. Interstate Waters (a)(2): N/A
- c. Other Waters (a)(3): N/A
- d. Impoundments (a)(4): N/A
- e. Tributaries (a)(5): SA016, is a tributary with permanent flow which directly connects with Willow Creek, an RPW, flowing east approximately 13.4 river miles into Spring Creek, a TNW; therefore, SA016 meets the definition of a tributary as defined in the pre-2015 regime post *Sackett* guidance and is a water of the United States.
- f. The territorial seas (a)(6): N/A
- g. Adjacent wetlands (a)(7): N/A

8. NON-JURISDICTIONAL AQUATIC RESOURCES AND FEATURES

- a. Describe aquatic resources and other features within the review area identified as "generally non-jurisdictional" in the preamble to the 1986 regulations (referred to as "preamble waters").⁸ Include size of the aquatic resource or feature within the review area and describe how it was determined to be non-jurisdictional under the CWA as a preamble water.

⁸ 51 FR 41217, November 13, 1986.

Ponds, Pond SA015 (0.26-acres):

The pond SA015 is an excavated pond that is used for livestock watering, or historically was used for watering, and is therefore a preamble water. Furthermore, this preamble water does not abut a TNW, RPW, and/or a jurisdictional impoundment. The 1986 preamble to 33 CFR 320-330 regulations states that for clarification it should be noted that we generally do not consider the following waters to be “waters of the United States...(C) artificial lakes or ponds created by excavating and/or diking dry land to collect and retain water and which are used exclusively for such purposes as stock watering, irrigation, setline basins, or rice growing. Therefore, SA015 is not a water of the United States and is not subject to Section 404 of the Clean Water Act.

- b. Describe aquatic resources and features within the review area identified as “generally not jurisdictional” in the *Rapanos* guidance. Include size of the aquatic resource or feature within the review area and describe how it was determined to be non-jurisdictional under the CWA based on the criteria listed in the guidance.

Ditches, SA010 & SX001 (553 Linear Feet):

There are 2 ditches (SA010 & SX001) on the tract totaling approximately 553 linear feet. The ditches were constructed in uplands and used to drain only uplands. The ditches only flow in response to precipitation events and do not have relatively permanent flow as evident in Google Earth aerial images. The ditches do not have a defined bed or bank and/or ordinary high-water mark. Therefore, the ditches are not a water of the United States subject to Section 404 of the Clean Water Act.

- c. Describe aquatic resources and features identified within the review area as waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of CWA. Include the size of the waste treatment system within the review area and describe how it was determined to be a waste treatment system N/A
- d. Describe aquatic resources and features within the review area determined to be prior converted cropland in accordance with the 1993 regulations (reference 2.b.). Include the size of the aquatic resource or feature within the review area and describe how it was determined to be prior converted cropland. N/A
- e. Describe aquatic resources (i.e. lakes and ponds) within the review area, which do not have a nexus to interstate or foreign commerce, and prior to the January 2001 Supreme Court decision in “*SWANCC*,” would have been jurisdictional

based solely on the “Migratory Bird Rule.” Include the size of the aquatic resource or feature, and how it was determined to be an “isolated water” in accordance with SWANCC. N/A

- f. Describe aquatic resources and features within the review area that were determined to be non-jurisdictional because they do not meet one or more categories of waters of the United States under the pre-2015 regulatory regime consistent with the Supreme Court’s decision in *Sackett* (e.g., tributaries that are non-relatively permanent waters; non-tidal wetlands that do not have a continuous surface connection to a jurisdictional water).

Wetlands, WA006, WA006a-d, WA008-011, WA013, SX002, WX001 (10.38 acres total):

Based on data sources listed in #9 below, our 10 March 2026 desk review, we have determined these wetlands reside in small depressional areas within the review area, that collects rainwater and is completely enclosed by elevated uplands. Based on our review, the wetland does not have any known continuous surface connection to any RPW, TNW, or impoundments of either. Therefore, in accordance with the pre-2015 regime post-Sackett and the 12 March 2025 Memorandum to the Field Between the U.S. Department of Army, U.S. Army Corps of Engineers, and the U.S. Environmental Protection Agency Concerning the Proper Implementation of “Continuous Surface Connection” Under the Definition of “Waters of the United States” Under the Clean Water Act, these wetlands do not meet the definition of adjacent as defined in the pre-2015 regime post Sackett guidance and are not waters of the United States subject to Section 404 of the Clean Water Act.

9. DATA SOURCES. List sources of data/information used in making determination. Include titles and dates of sources used and ensure that information referenced is available in the administrative record.
